## Ruian plates machine PRO zt 200

### Quotation

Model	PRO-ZT-200 paper bucket making machine	
Weight	4000KG	
Size	Size: 3100x1600x1800	
Power	三相380V, 8KW	
Air Source	0.5-0.8MPa, 0.4m <sup>3</sup> /min	
Capacity	30-35 pcs/min	
Paper	Single/Double PE	
GSM	250-350g/m <sup>2</sup>	
Bowl Size	(A) $\phi$ 140-220mm	(B) $\phi$ 50-210mm
	(C) $\phi$ 110-175mm	(D) $\phi$ 6-10mm
Electricity		

	Inverter	Huifeng	
	Relay	Shanghai	
	Main motor	Shanghai	
	Curling motor	shanghai	
	PLC	Mitsubishi	
	Touch Screen	Weinview	
Air source	Cylinder	China	
Specification	Drive axil	40CR	
	Straight Axil	Korean	
	Intermittent separator	Shandong	
	mould/Knurling	CR12 quench/40CR nitrogenize	
	Cam	nitrogenize	
	Turnplate	Alloy	

## Instruction:

PRO-ZT-200 is a set of full automatic paper bucket making machine is a fully automatic paper bucket molding equipment. Through multiple rows of automatic paper delivery, paper anti-retreat devices(to ensure accurate positioning), oil injection, robot hand paper transfer, upper cup tube, bottom punch, fold bottom, Preheat, knurling, curling, unloading cup and other continuous processes,this model can make various size of paper bucket by changing mould. This is newest invention made by our company.

## Main Character:

1. This model PRO-ZT-200 paper bucket making machine speed is about 30-35 per min, much more than traditional machine at speed 20-25 pcs per min. Although capacity is more,but the power consumptive is only 8kw.
2. Machine size is not big, and the structure is more reasonable, the process is simpler. From 3 plate, we change turn plate into single turnplate, it is easy to collect cups.
3. The bottom paper is under the mould, the paper bottom cut and joint with cup body, so it avoid cup turnover.
4. The paper curling adopts a separate cam, then the stroke of the lifting plate is greatly reduced and the vibration of the machine is reduced, so as to improve stability.
5. Hold tube Station is driven by 3-into-1 Cam system, which can work voiceless and more stably. This is leading technology in China.

### **3. Guarantee period and maintenance:**

The guarantee period is one year after the installation and adjustment.

Buyer is responsible for the costs including maintenance and spare parts if the equipment damage is caused by the buyer's improper use, not caused by the seller's design and manufacturing.

If the buyer needs seller to send an engineer the installation and training. The buyer should cover the all of expense for the seller's engineers, such as, air-tickets, visa, accommodation and local traffic charges, salary(USD 100/day) in Buyer's side. And the buyer should do his best to cooperate the engineers of sales party in installation, supply the enough labor and tools, necessary accessory with them.

### **4. Packing and marking:**

Standard Packing

NOTES :

EXTRA FULL MOULD 2000\$ HALF MOULD 1200\$
