

## طابعة ورق حراري ألوان

### 2 Colors Thermal Paper Printer

- Main Technical Specification:

Model of Machine:	PRO -P2100
Max. Width of Printing Material:	1000mm
Max. Printing Width:	960mm
Length Range of Printed Product:	191-914mm
Max. Diameter of Roll Material:	600mm
Printing Speed:	5~50m/min
Total Power:	4.5kw
Weight:	2200kgs
Overall Dimensions:	1800×2300×2200mm

Specifications

1) This machine is suitable for printing such packing materials as Thermal paper, POS paper, polyethylene, polypropylene plastic bag, glass paper and roll paper, etc. And it is a kind of ideal printing equipment for producing paper packing bag for food, supermarket handbag, vest bag and clothes bag, etc.

2) It adopts iron casting structure with stable function, easy operation, flexible starting and high accurate.

3) It adopts programmed control system and meter counter. One working length is setup on the control panel, after got to the setup data, the machine will automatically stop and alarm

4) It adopts famous brand frequency inverter to control AC motor with stable function.

5) It adopts pneumatic lifting system for printing cylinder. After the printing cylinder, the ink rubber roller and anilox roller will continuously work to avoid ink being stuck on the roller.

6) All the gears are especially surface treated and grinded, so as to get a low noise, long duration and high accurate for printing.

7) It adopts 350LPI roller ( other lines anilox roller is available) 360 degree continuous adjustment.

8) It adopts hot air blower and cold air blower for fast ink drying simultaneously

9) Each printing unit has a clutch and separate registration system with easy operation.

10) It adopts EPC for material edge tracking to achieve a good smooth rewinding.

11) It adopts double position unwinding/rewinding stand to realize non-stop exchange.

Remarks:

1. Made in **China**
2. Delivery time: 90 days
3. Warranty time: One years (wearing parts are not included in the warranty scope.)
